ABOUT ME

Backend engineer with 10+ years of experience building scalable systems in Node.js environments. I thrive in high-growth environments working across payment systems, developer tooling, and platform engineering. Node.js and JavaScript are my core stack; currently expanding into Go and Rust. Comfortable owning end-to-end delivery from architecture to production.

EXPERIENCE

Sr. Backend Engineer — MODO Feb 2025 – Present

- Develops payment infrastructure for a QR-based system processing 150K daily users across Argentina.
- Built end-to-end trip and payment flows, including offline QR support and fraud prevention systems.
- Owns production incident management and on-call for core payment services.

Sr. Fullstack Developer — Denode Oct 2023 – Feb 2025

- Contributed to a Remove Background image processing product; handled backend scaling and API design.
- Built a full-stack gaming key management platform (Node.js, React) with real-time inventory tooling.
- Delivered administrative dashboards and internal tooling used across multiple client projects.

Sr. Backend Engineer — SecurityScorecard Oct 2021 – Mar 2023

- Created rate-limiting infrastructure adopted across the organization to protect critical API surfaces.
- Worked on Cyber Risk Quantification features, integrating threat data into customer-facing dashboards.

Sr. Backend Engineer — MURAL Oct 2020 – Oct 2021

- Canvas Workflows team: built export/import pipelines, content visualization, and image processing tools.
- Core Platform team: developed third-party integrations and internal API frameworks.

Sr. Software Engineer — SparkDigital Aug 2018 – Oct 2020

- Led Node.js backend architecture for W.W. Norton’s digital publishing platform.
- Built real-time collaboration systems using Socket.io; co-founded internal RAY Initiative.

SKILLS

Languages	Node.js, JavaScript / TypeScript, Go (learning), Rust (learning)
Infrastructure	AWS, Kubernetes, Docker
Backend	Distributed systems, REST, GraphQL, gRPC, PostgreSQL, Redis
Frontend	React, Socket.io

EDUCATION

Computer Engineering — Universidad FASTA, Argentina 2008 – 2017

- Research in Android forensics and mobile data extraction.
